

WardMM Medication Quality and Safety Toolkit

Supporting *YOU* to comply with the Aged Care Quality Standards

Standard 3: Personal care and clinical care

What *YOU* can do:

Ensure consumers have access to high quality medication management services which are tailored to the individual's health care goals and:

- Identify and manage the use of high-risk medications
- Promote and support appropriate antibiotic prescribing
- Ensure medication plans account for a consumer's preferences at end of life

WardMM can support *YOU* by providing:

- Information regarding types of medication management services available
- Expert geriatric medication specialists
- High-risk medication audits and reporting
- Antimicrobial Stewardship programs

Contact WardMM today for advice and services to meet Standard 3

WardMM Medication Quality and Safety Toolkit

Supporting *YOU* to comply with the Aged Care Quality Standards

Standard 8: Organisational Governance

What *YOU* can do:

- Ensure consumers have access to medication management services that are accountable for the quality of the services they provide.
- Engage with medication management services to develop evidence-based clinical governance frameworks for high-risk practices (antibiotic use and use of restraint).

WardMM can support *YOU* by providing:

- Services which are governed by quality principles including information management, continuous improvement, regulatory compliance and workforce governance.
- Leadership on the development and implementation of appropriate risk management strategies and programs for addressing the use of high-risk medications.
- Leadership on the development and implementation of clinical governance frameworks for antimicrobial stewardship and minimising the use of restraint.
